

Install Java Management Tools

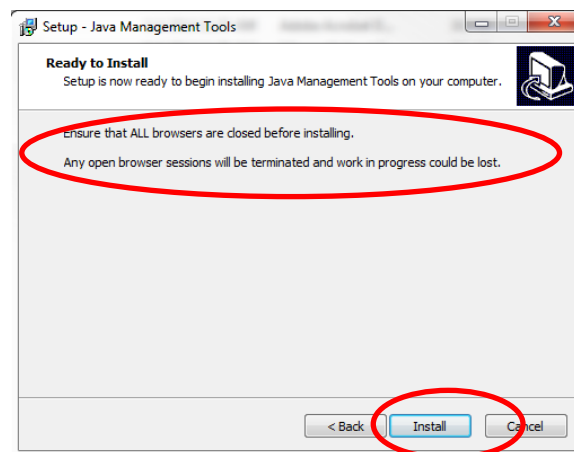

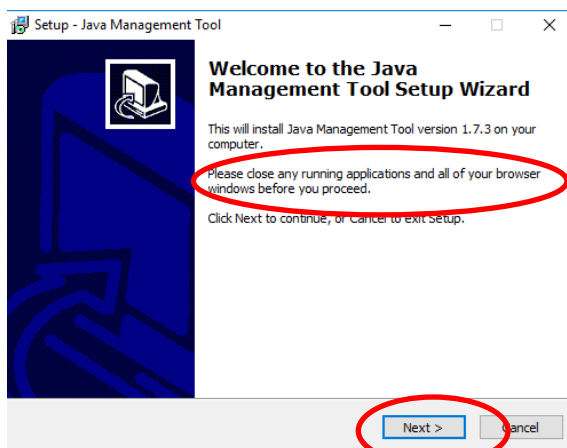

- ❖ Log out of all Web applications and close all browser tabs except those needed for this installation.
- ❖ Click 'Run'.

- ❖ If prompted enter credentials for an account with local administrator access.

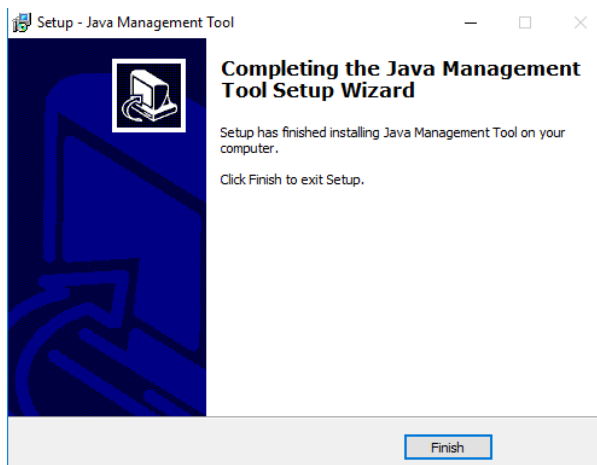

- ❖ Next > Install

- ❖ Progress screens/messages may differ slightly depending on which components your computer requires.

- ❖ Note: If not already installed, the Configuration Manager client (ConfigMan/ConfigMgr) will be installed silently/invisibly on UNH AD-connected computers.
- ❖ Click Finish to complete the installation

Allow Java add-on if prompted when launching browser.

Allow Java Plug-in if prompted when launching browser.
